## Consonants and Vowels

When you were a child, you learned to speak Through repeatedly hearing the words spoken around you. You learned to speak first then you learned to read.

In English , a,e,i,o, and u are called vowels. “Y” may be a vowel, as in “try” or a consonant as in “year”

When our forefathers spoke Yisre’eyleeth ~~X~~ ~~Z~~ ~~L~~ ~~X~~ ~~4~~ ~~W~~ ~~Z~~ it was a custom to only write Semitic languages utilizing only the consonants. With out the vowels this sentence would be:

WHN R FRFTHRS SPK YSRLTH T WA CSTM T NL WRT SMTCLNGGS TLZNG NL TH CNSNNTS

They were able to read and write this way because they already knew the spoken language and didn’t need the vowels because based on the context they knew what words were being used by their familiarity with the spoken language.

but for children and in our case as a nation relearning their estranged language, it's necessary to utilize the written vowels, cause Yisrael as a people overall have zero familiarity with the spoken language
